To,
The Members,
SOCIETY FOR PREVENTION OF CRUELTY TO ANIMALS (S.P.C.A.)

Hon'ble Members

Your Executive Committee takes pleasure in presenting Annual Report for the year ending 31st March 2020 along with Audited Annual Accounts for the year ended on that date. During the year under review, the following are our achievements.

ACTIVITIES & PROGRAMMES

CRUELTY PREVENTION TEAM EXP.

Cruelty to animals, also called animal abuse, animal neglect or animal cruelty, is the infliction by omission (animal neglect) or by commission by humans of suffering or harm upon any non-human. More narrowly, it can be the

causing of harm or suffering for specific achievement, such as killing animals for food or for their fur; opinions differ about the extent of cruelty associated with a given method of slaughter. Cruelty to animals sometimes encompasses inflicting harm or suffering as an end in itself, defined as zoosadism.

ANIMALS HEALTH EXPES.

Dairy sector plays an important role as a subsidiary source of income in addition to agriculture for the rural masses in India. In case of Bihar, its importance increases manifold as agriculture and dairying is the major

source of livelihood for large number of people. Bihar state has large number of cattle. But due to various factor, milk production in Bihar is not

animals sometimes encompasses inflicting harm or suffering as an end in itself, defined as zoosadism.

Divergent approaches to laws concerning animal cruelty occur in different jurisdictions throughout the world. For example, some laws govern methods of killing animals for food, clothing, or other products, and other laws concern the keeping of animals for entertainment, education, research, or pets.

There are a number of conceptual approaches to the issue of cruelty to animals.

For example, the animal welfare position holds that there is nothing inherently wrong with using animals for human purposes, such as food, clothing, entertainment, and research, but that it should be done in a way that minimizes unnecessary pain and suffering, sometimes referred to as "humane" treatment.

Utilitarian advocates argue from the position of costs and benefits and vary in their conclusions as to the allowable treatment of animals. Some utilitarians argue for a weaker approach which is closer to the animal welfare position, whereas others argue for a position that is similar to animal rights. Animal rights theorists criticize these positions, arguing that the words "unnecessary" and "humane" are subject to widely differing interpretations, and that animals have basic rights. They say that the only way to ensure protection for animals is to end their status as property and to ensure that they are never used as commodities.

ANIMALS TRAFFIKING AWARENESS PROG.

Animal cognition describes the mental capacities of non-human animals and the study of those capacities. The field developed from comparative psychology, including the study of animal conditioning and learning. It has also been strongly influenced by research

in ethology, behavioral ecology, and evolutionary psychology, and hence the

commensurate with the number of cattle. In other words, milk productivity in Bihar is low. Cattle owners face other challenges which make this sector unviable from economic point of view. These challenges are rising input costs, medical costs infertility problems etc. Veterinary services costs and infertility problems in livestock are major factors responsible for making this sector unviable, when done at small scale.

ANIMAL REHABILITANTS HEALTH EXPENSES

Medical debt refers to debt incurred by individuals due to health care costs and related expenses.

Medical debt is different from other forms of debt, because it is usually incurred accidentally or faultlessly. People do not plan to fall ill or hurt themselves, and health care remedies are often unavoidable; medical debt is often treated with more sympathy than other kinds of debt resulting in advice that people ought not try to convert it to credit card deb. Medical debt is an especially

notable phenomenon in the United States. In less developed nations those on low income *in need of treatment will often avail themselves of what ever help they can from either the state or NGOs* without going into debt, and in most developed countries public coverage of healthcare costs are comprehensive. But in the USA, even when the patient has insurance coverage, including coverage under the Patient Protection and Affordable Care Act of 2010, considerable medical costs remain the patient's responsibility. Consequently, medical debt has been found by a 2009 study to be the primary cause of personal bankruptcy.

ANIMAL CRUETLY AWARENESS PROG.

alternative name cognitive ethology is sometimes used. Many behaviors associated with the term *animal intelligence* are also subsumed within animal cognition. Researchers have examined animal cognition in mammals (especially primates, cetaceans, elephants, dogs, cats, pigs, horses,^{[2][3][4]} cattle, raccoons and rodents), birds (including parrots, fowl, corvids and pigeons), reptiles (lizards and snakes), fish and invertebrates (including cephalopods, spiders and insects).

EXAMINE FOR HEALTH OF ANIMALS FAIR

Animal welfare is the well-being of nonhuman animals. The standards of "good" animal welfare vary considerably between different contexts. These standards are under constant review and are debated, created and revised by animal welfare groups, legislators and academics worldwide.^{[1][2]} Animal welfare science uses various measures, such as longevity, disease, immunosuppression, behavior, physiology, and reproduction,^[3] although there is debate about which of these indicators provide the best information.

Respect for animal welfare is often based on the belief that nonhuman animals are sentient and that consideration should be given to their well-being or suffering, especially when they are under the care of humans.^[4] These concerns can include how animals are slaughtered for food, how they are used in scientific research, how they are kept (as pets, in zoos, farms, circuses, etc.), and how human activities affect the welfare and survival of wild species.

There are two forms of criticism of the concept of animal welfare, coming from diametrically opposite positions. One view, held by some thinkers in history, holds that humans have no duties of any kind to animals. The other view is based on the animal rights position that animals should not be regarded as property and any use of animals by humans is unacceptable. Accordingly,

They say that the only way to ensure protection for animals is to end their status as property and to ensure that they are never used as commodities.

ANIMALS TRAFFIKING AWARENESS PROG.

Animal cognition describes the mental capacities of non-human animals and the study of those capacities. The field developed from comparative psychology, including the study of animal conditioning and learning. It has also been strongly influenced by research

in ethology, behavioral ecology, and evolutionary psychology, and hence the

commensurate with the number of cattle. In other words, milk productivity in Bihar is low. Cattle owners face other challenges which make this sector unviable from economic point of view. These challenges are rising input costs, medical costs infertility problems etc. Veterinary services costs and infertility problems in livestock are major factors responsible for making this sector unviable, when done at small scale.

ANIMAL REHABILITANTS HEALTH EXPENSES

Medical debt refers to debt incurred by individuals due to health care costs and related expenses.

Medical debt is different from other forms of debt, because it is usually incurred accidentally or faultlessly. People do not plan to fall ill or hurt themselves, and health care remedies are often unavoidable; medical debt is often treated with more sympathy than other kinds of debt resulting in advice that people ought not try to convert it to credit card deb. Medical debt is an especially

notable phenomenon in the United States. In less developed nations those on low income in need of treatment will often avail themselves of what ever help they can from either the state or NGOs without going into debt, and in most developed countries public coverage of healthcare costs are comprehensive. But in the USA, even when the patient has insurance coverage, including coverage under the Patient Protection and Affordable Care Act of 2010, considerable medical costs remain the patient's responsibility. Consequently, medical debt has been found by a 2009 study to be the primary cause of personal bankruptcy.

ANIMAL CRUETLY AWARENESS PROG.

Cruelty to animals, also called animal abuse, animal neglect or animal cruelty, is the infliction by omission (animal neglect) or by commission by humans of suffering or harm upon any non-human. More narrowly, it can be the causing of harm or suffering for specific achievement, such as killing animals for food or for their fur; opinions differ about the extent of cruelty associated with a given method of slaughter. Cruelty to

alternative name cognitive ethology is sometimes used. Many behaviors associated with the term *animal intelligence* are also subsumed within animal cognition. Researchers have examined animal cognition in mammals (especially primates, cetaceans, elephants, dogs, cats, pigs, horses,^{[2][3][4]} cattle, raccoons and rodents), birds (including parrots, fowl, corvids and pigeons), reptiles (lizards and snakes), fish and invertebrates (including cephalopods, spiders and insects).

EXAMINE FOR HEALTH OF ANIMALS FAIR

Animal welfare is the well-being of nonhuman animals. The standards of "good" animal welfare vary considerably between different contexts. These standards are under constant review and are debated, created and revised by animal welfare groups, legislators and academics worldwide.^{[1][2]} Animal welfare science uses various measures, such as longevity, disease, immunosuppression, behavior, physiology, and reproduction,^[3] although there is debate about which of these indicators provide the best information.

Respect for animal welfare is often based on the belief that nonhuman animals are sentient and that consideration should be given to their well-being or suffering, especially when they are under the care of humans.^[4] These concerns can include how animals are slaughtered for food, how they are used in scientific research, how they are kept (as pets, in zoos, farms, circuses, etc.), and how human activities affect the welfare and survival of wild species.

There are two forms of criticism of the concept of animal welfare, coming from diametrically opposite positions. One view, held by some thinkers in history, holds that humans have no duties of any kind to animals. The other view is based on the animal rights position that animals should not be regarded as property and any use of animals by humans is unacceptable. Accordingly,

EXAMINE FOR HEALTH OF ANIMALS FAIR

Animal welfare is the well-being of nonhuman animals. The standards of "good" animal welfare vary considerably between different contexts. These standards are under constant review and are debated, created and revised by animal welfare groups, legislators and academics worldwide.^{[1][2]} Animal welfare science uses various measures, such as longevity, disease, immunosuppression, behavior, physiology, and reproduction,^[3] although there is debate about which of these indicators provide the best information.

Respect for animal welfare is often based on the belief that nonhuman animals are sentient and that consideration should be given to their well-being or suffering, especially when they are under the care of humans.^[4] These concerns can include how animals are slaughtered for food, how they are used in scientific research, how they are kept (as pets, in zoos, farms, circuses, etc.), and how human activities affect the welfare and survival of wild species.

There are two forms of criticism of the concept of animal welfare, coming from diametrically opposite positions. One view, held by some thinkers in history, holds that humans have no duties of any kind to animals. The other view is based on the animal rights position that animals should not be regarded as property and any use of animals by humans is unacceptable. Accordingly,

alternative name cognitive ethology is sometimes used. Many behaviors associated with the term *animal intelligence* are also subsumed within animal cognition. Researchers have examined animal cognition in mammals (especially primates, cetaceans, elephants, dogs, cats, pigs, horses,^{[2][3][4]} cattle, raccoons and rodents), birds (including parrots, fowl, corvids and pigeons), reptiles (lizards and snakes), fish and invertebrates (including cephalopods, spiders and insects).

commensurate with the number of cattle. In other words, milk productivity in Bihar is low. Cattle owners face other challenges which make this sector unviable from economic point of view. These challenges are rising input costs, medical costs infertility problems etc. Veterinary services costs and infertility problems in livestock are major factors responsible for making this sector unviable, when done at small scale.

ANIMAL REHABILITANTS HEALTH EXPENSES

Medical debt refers to debt incurred by individuals due to health care costs and related expenses.

Medical debt is different from other forms of debt, because it is usually incurred accidentally or faultlessly. People do not plan to fall ill or hurt themselves, and health care remedies are often unavoidable; medical debt is often treated with more sympathy than other kinds of debt resulting in advice that people ought not try to convert it to credit card deb. Medical debt is an especially

notable phenomenon in the United States. In less developed nations those on low income in need of treatment will often avail themselves of what ever help they can from either the state or NGOs without going into debt, and in most developed countries public coverage of healthcare costs are comprehensive. But in the USA, even when the patient has insurance coverage, including coverage under the Patient Protection and Affordable Care Act of 2010, considerable medical costs remain the patient's responsibility. Consequently, medical debt has been found by a 2009 study to be the primary cause of personal bankruptcy.

ANIMAL CRUELTY AWARENESS PROG.

Cruelty to animals, also called animal abuse, animal neglect or animal cruelty, is the infliction by omission (animal neglect) or by commission by humans of suffering or harm upon any non-human. More narrowly, it can be the causing of harm or suffering for specific achievement, such as killing animals for food or for their fur; opinions differ about the extent of cruelty associated with a given method of slaughter. Cruelty to

ANIMAL CRUELTY AWARENESS PROG.

Cruelty to animals, also called animal abuse, animal neglect or animal cruelty, is the infliction by omission (animal neglect) or by commission by humans of suffering or harm upon any non-human. More narrowly, it can be the causing of harm or suffering for specific achievement, such as killing animals for food or for their fur; opinions differ about the extent of cruelty associated with a given method of slaughter. Cruelty to

animals sometimes encompasses inflicting harm or suffering as an end in itself, defined as zoosadism.

Divergent approaches to laws concerning animal cruelty occur in different jurisdictions throughout the world. For example, some laws govern methods of killing animals for food, clothing, or other products, and other laws concern the keeping of animals for entertainment, education, research, or pets.

There are a number of conceptual approaches to the issue of cruelty to animals.

For example, the animal welfare position holds that there is nothing inherently wrong with using animals for human purposes, such as food, clothing, entertainment, and research, but that it should be done in a way that minimizes unnecessary pain and suffering, sometimes referred to as "humane" treatment.

Utilitarian advocates argue from the position of costs and benefits and vary in their conclusions as to the allowable treatment of animals. Some utilitarians argue for a weaker approach which is closer to the animal welfare position, whereas others argue for a position that is similar to animal rights. Animal rights theorists criticize these positions, arguing that the words "unnecessary" and "humane" are subject to widely differing interpretations, and that animals have basic rights. They say that the only way to ensure protection for animals is to end their status as property and to ensure that they are never used as commodities.

ANIMALS TRAFFIKING AWARENESS PROG.

Animal cognition describes the mental capacities of non-human animals and the study of those capacities. The field developed from comparative psychology, including the study of animal conditioning and learning. It has also been strongly influenced by research

in ethology, behavioral ecology, and evolutionary psychology, and hence the

AUDITORS' REPORT

We have audited the attached Balance Sheet **SOCIETY FOR PREVENTION OF CURELTY TO ANIMAL (S.P.C.A), SIGNATURE TOWER, OFFICE NO.-27, KURJI, DISTT. - PATNA (BIHAR)** as at 31st, March 2025 and also the Income & Expenditure Account, Receipt & Payment Account for the year ended on that date annexed thereto. These financial statements are the responsibility of the organization Management. Our responsibility is to express an opinion on these financial statements based on our audit.

Our audit includes examining the books of accounts, vouchers and other records supporting the amounts and disclosures in the financial statements. We report as follows:

- (A) In our opinion, there are no transactions, appear to be contrary to the provisions of the Byelaws of the Organization.
- (B) We have verified Cash & Bank Balances by the production of certificate by the Management.
- (C) Fixed assets have been physically verified by the Management. Depreciation to the Fixed assets has been provided for.
- (D) We have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purpose of our audit.
- (E) In our opinion, proper books of accounts as required, subject to cash basis of accounting, have been kept by the Organization so far as appears from our examination of those books.
- (F) The Balance sheet, Receipt & Payment Account and Income & Expenditure Account are in agreement with the books of accounts.
- (G) In our opinion and to the best of our information and according to the explanations given to us, the said accounts give a true and fair view:

- (1) In the case of Balance Sheet, of the state of affairs as at 31/03/2025 and
- (2) In the case of Income & Expenditure Account, of the excess of Expenditure over Income for the year ended on that date.

AUDITORS' REPORT

We have audited the attached Balance Sheet **SOCIETY FOR PREVENTION OF CURELTY TO ANIMAL (S.P.C.A), SIGNATURE TOWER, OFFICE NO.-27, KURJI, DISTT. - PATNA (BIHAR)** as at 31st, **March 2024** and also the Income & Expenditure Account, Receipt & Payment Account for the year ended on that date annexed thereto. These financial statements are the responsibility of the organization Management. Our responsibility is to express an opinion on these financial statements based on our audit.

Our audit includes examining the books of accounts, vouchers and other records supporting the amounts and disclosures in the financial statements. We report as follows:

- (A) In our opinion, there are no transactions, appear to be contrary to the provisions of the Byelaws of the Organization.
- (B) We have verified Cash & Bank Balances by the production of certificate by the Management.
- (C) Fixed assets have been physically verified by the Management. Depreciation to the Fixed assets has been provided for.
- (D) We have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purpose of our audit.
- (E) In our opinion, proper books of accounts as required, subject to cash basis of accounting, have been kept by the Organization so far as appears from our examination of those books.
- (F) The Balance sheet, Receipt & Payment Account and Income & Expenditure Account are in agreement with the books of accounts.
- (G) In our opinion and to the best of our information and according to the explanations given to us, the said accounts give a true and fair view:

- (1) In the case of **Balance Sheet**, of the state of affairs as at 31/03/2024 and
- (2) In the case of **Income & Expenditure Account**, of the excess of Expenditure over Income for the year ended on that date.

AUDITORS' REPORT

We have audited the attached Balance Sheet SOCIETY FOR PREVENTION OF CURRELTLY TO ANIMAL (S.P.C.A), SIGNATURE TOWER, OFFICE NO.-27, KURJI, DISTT.- PATNA (BIHAR) as at 31st, March 2021 and also the Income & Expenditure Account, Receipt & Payment Account for the year ended on that date annexed thereto. These financial statements are the responsibility of the Organization Management. Our responsibility is to express an opinion on these financial statements based on our audit.

Our audit includes examining the books of accounts, vouchers and other records supporting the amounts and disclosures in the financial statements. We report as follows:

- (A) In our opinion, there are no transactions, appear to be contrary to the provisions of the Bylaws of the Organization.
 (B) We have verified Cash & Bank Balances by the production of certificate by the Management.
 (C) Fixed assets have been physically verified by the Management. Depreciation to the Fixed assets has been provided for.
 (D) We have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purpose of our audit.
 (E) In our opinion, proper books of accounts as required, subject to cash basis of accounting, have been kept by the Organization so far as appears from our examination of those books.
 (F) The Balance sheet, Receipt & Payment Account and Income & Expenditure Account are in agreement with the books of accounts.
 (G) In our opinion and to the best of our information and according to the explanations given to us, the said accounts give a true and fair view:

- (1) In the case of Balance Sheet, of the state of affairs as at 31/03/2021 and
 (2) In the case of Income & Expenditure Account, of the excess of Expenditure over
 Income for the year ended on that date.

AUDITORS' REPORT

We have audited the attached Balance Sheet **SOCIETY FOR PREVENTION OF CURELITY TO ANIMAL (S.P.C.A), SIGNATURE TOWER, OFFICE NO-27, KURJI, DISTT.-PATNA (BIHAR)** as at 31st, March 2020 and also the Income & Expenditure Account, Receipt & Payment Account for the year ended on that date annexed thereto. These financial statements are the responsibility of the Organization Management. Our responsibility is to express an opinion on these financial statements based on our audit.

Our audit includes examining the books of accounts, vouchers and other records supporting the amounts and disclosures in the financial statements. We report as follows:

- (A) In our opinion, there are no transactions, appear to be contrary to the provisions of the Byelaws of the Organization.
- (B) We have verified Cash & Bank Balances by the production of certificate by the Management.
- (C) Fixed assets have been physically verified by the Management. Depreciation to the Fixed assets has been provided for.
- (D) We have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purpose of our audit.
- (E) In our opinion, proper books of accounts as required, subject to cash basis of accounting, have been kept by the Organization so far as appears from our examination of those books.
- (F) The Balance sheet, Receipt & Payment Account and Income & Expenditure Account are in agreement with the books of accounts.
- (G) In our opinion and to the best of our information and according to the explanations given to us, the said accounts give a true and fair view:
 - (1) In the case of Balance Sheet, of the state of affairs as at 31/03/2020 and
 - (2) In the case of Income & Expenditure Account, of the excess of Expenditure over Income for the year ended on that date.

- (C) Fixed assets have been physically verified by the Management. Depreciation to the Fixed assets has been provided for.
- (D) We have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purpose of our audit.
- (E) In our opinion, proper books of accounts as required, subject to cash basis of accounting, have been kept by the Organization so far as appears from our examination of those books.
- (F) The Balance sheet, Receipt & Payment Account and Income & Expenditure Account are in agreement with the books of accounts.
- (G) In our opinion and to the best of our information and according to the explanations given to us, the said accounts give a true and fair view:
 - (1) In the case of Balance Sheet, of the state of affairs as at 31/03/2020 and
 - (2) In the case of Income & Expenditure Account, of the excess of Expenditure over Income for the year ended on that date.
